

Vision

Contributing to national prosperity by providing efficient and effective administration of Australia's offshore petroleum, greenhouse gas, and electricity infrastructure regimes, on transition to net zero.

Purpose

To provide advice to government and decision makers on the grant and administration of titles and licences, monitoring compliance with title and licence conditions, data management and resource stewardship.

Culture

We are innovative, responsive, consistent and impartial. We act with honesty and integrity. We are inclusive and respect the views of others.

Role

Resource Stewardship

Provide responsible administrative and regulatory oversight of Australia's offshore petroleum, greenhouse gas, and renewable energy resource projects.

Leveraging Information & Technology

Improve and integrate our systems to enhance security, information, accessibility, and evidence-based decision making.

Engagement

Enhance stakeholder engagement strategies to promote efficient and effective working relationships.

Regulatory Excellence

Foster and support a cost efficient, high performing workforce, focused on continuous improvement, best practice outcomes and a positive workplace culture.

Goals

- Efficiently administer titles and licences to support transition to net zero while maintaining energy security.
- Use performance monitoring and industry benchmarking strategies to assist in optimising offshore resource projects.
- Encourage responsible use of infrastructure and technology to ensure offshore petroleum projects are developed, matured and decommissioned in a responsible manner.
- Maintain an effective risk-based compliance and enforcement framework.

- Integrate systems to improve governance, analysis and modelling.
- Enable the digital transformation of submission processes.
- Leverage technology to promote collaboration and innovative approaches.
- Stay informed of relevant technological advancements and operational practices.
- Facilitate access to publicly available information, including open file data.

- Collaborate to improve legislation and guidance material and minimise regulatory burden.
- Foster cooperative relationships with industry, government and our overseas counterparts to maintain a unified, efficient and best practice operating environment.
- Consult and report transparently on performance.
- Keep stakeholders informed of significant decisions, actions, announcements and events.

- Exercise legislative powers and functions in line with government expectations and policy.
- Ensure assessment timeframes for applications are met 90% of the time.
- Maintain cost effective and efficient operations, along with a competent capacity.
- Ensure risks are appropriately anticipated, monitored and controlled.
- Promote and maintain a flexible, safe and inclusive workplace.
